智慧地下屋

The Wisdom of the Below Ground House

慢

原

takuliacu! takuliacu! pitataisa Vanau makuvauvau.

不好了!不好了!飛奔大喊著。

Oh no! Oh no! Behuy yells out.

hlamairahlu ia ta'iaraisaka Ryuk langica tautatungusana hlimacukuhlu parana ucani sasaruana, kuhlaisai kuakita Vanauna kani'i hlitakuliliungu Aruna Ivatas.

原來是因為 Ryuk 太空站已經來到地球的另一側，所以飛奔看不到吉娃斯拜訪的 Ivatas 了。

The Ryuk Space Station has traveled to the other side of the earth, so Behuy can't see Ivatas where Giwas is visiting.

慢

原

mavacangukai, tuahlumana angahli hlipi'ahlingua Wisingina kumakita Ivatas.

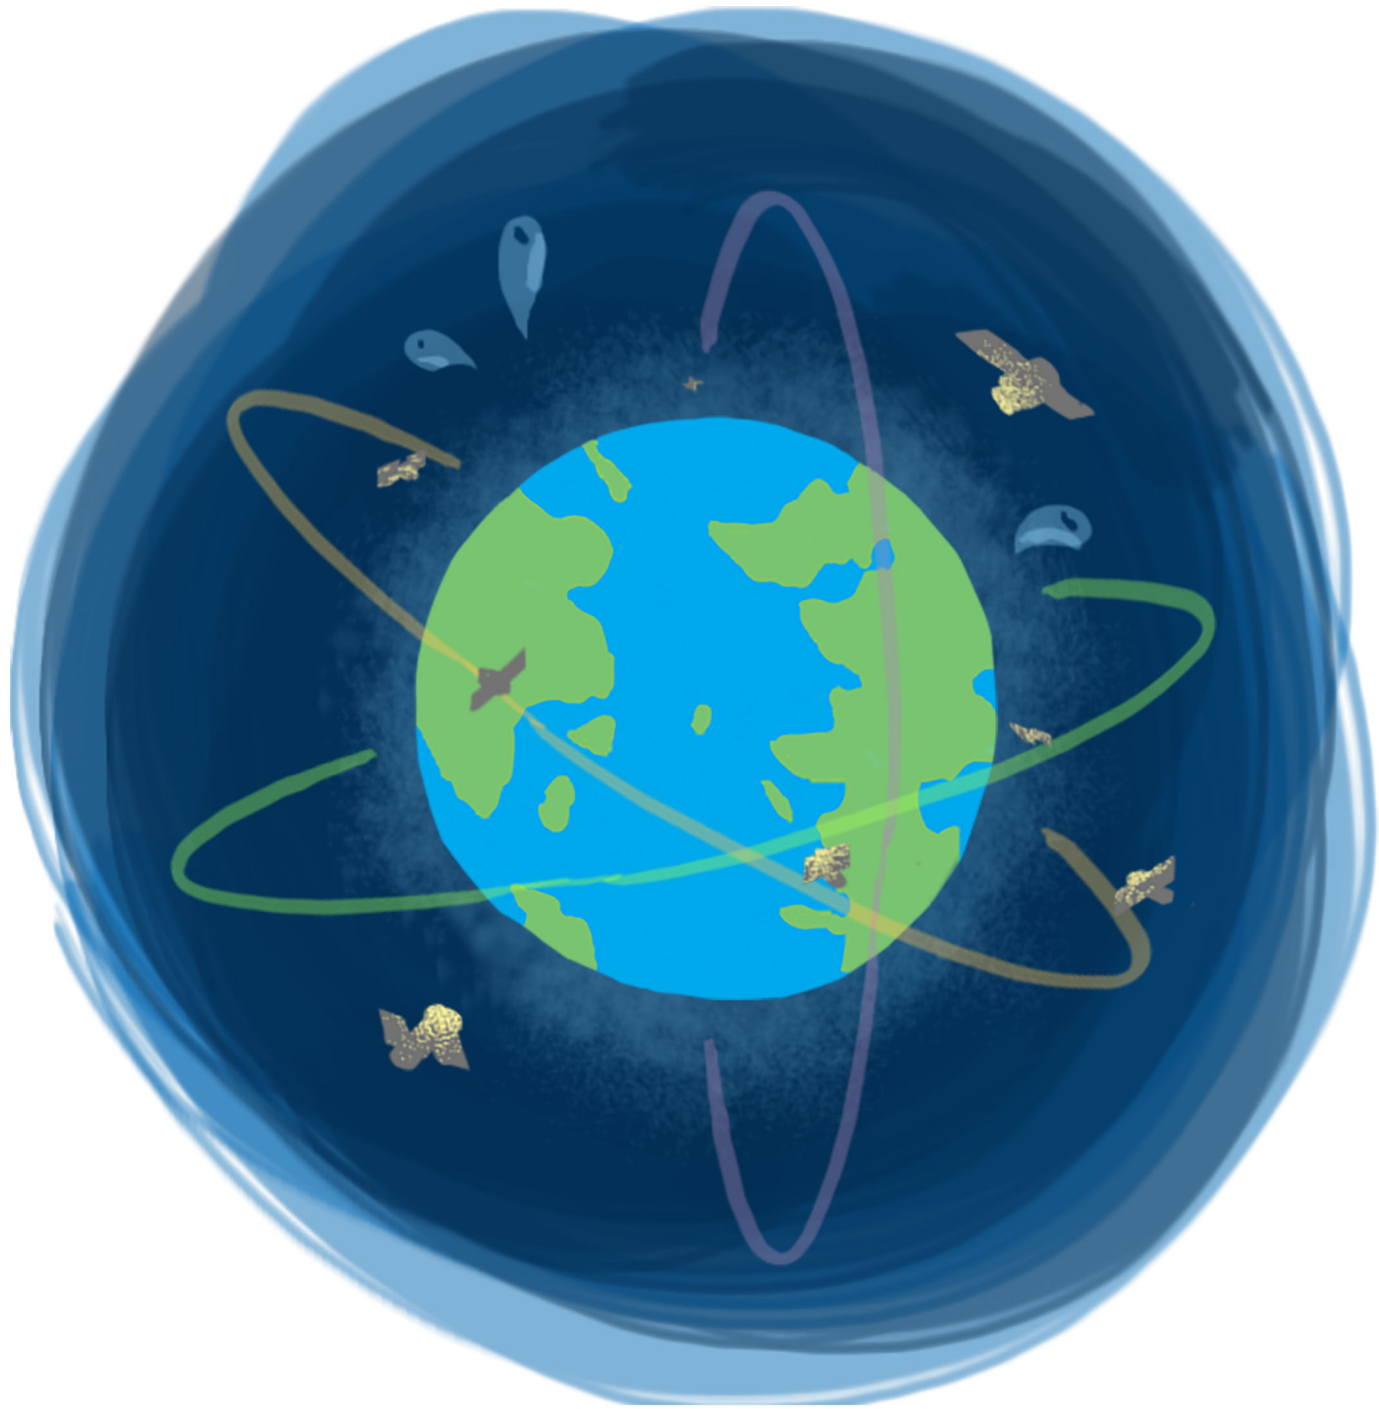

幸好，還可以從衛星拍攝的照片觀察Ivatas。

Luckily, he can still observe Ivatas from satellite images.

ta'iaraisaka kani'i langicaisa Wisingi naia ihlaisa hliapusiria matumuhlua Wisingi kikucu tarucucuvungu, muruvi'avi'a ma liliungaisa ucani sasaruana, tuahlu kinsa langicaisa aucaucani parana ma ucani sasaruana.

因為氣象衛星是由許多顆衛星共同組成，散佈在地球的周圍，可以探測到地球每一個地方的天氣。

Meteorological satellite systems are made up of many satellites scattered all around the earth so that they can detect the weather in every part of the earth.

慢

原

hlaa ta'iaraisaka takualungusua sitakuamia, tuahlua Wisingi kuapariakuanu lululunga ahla usahlua, mataingalua tuahlua mavavacangu kinsa paranaisa langica manganu hla mikasukasu manganu.

而且因為技術的進步，衛星可以不受雲層或水氣的影響，更能準確判斷高氣壓與低氣壓的位置。

Furthermore, because of improvements in technology, satellites are not affected by cloud cover and moisture so they can accurately determine the location of high pressure systems and low pressure systems.

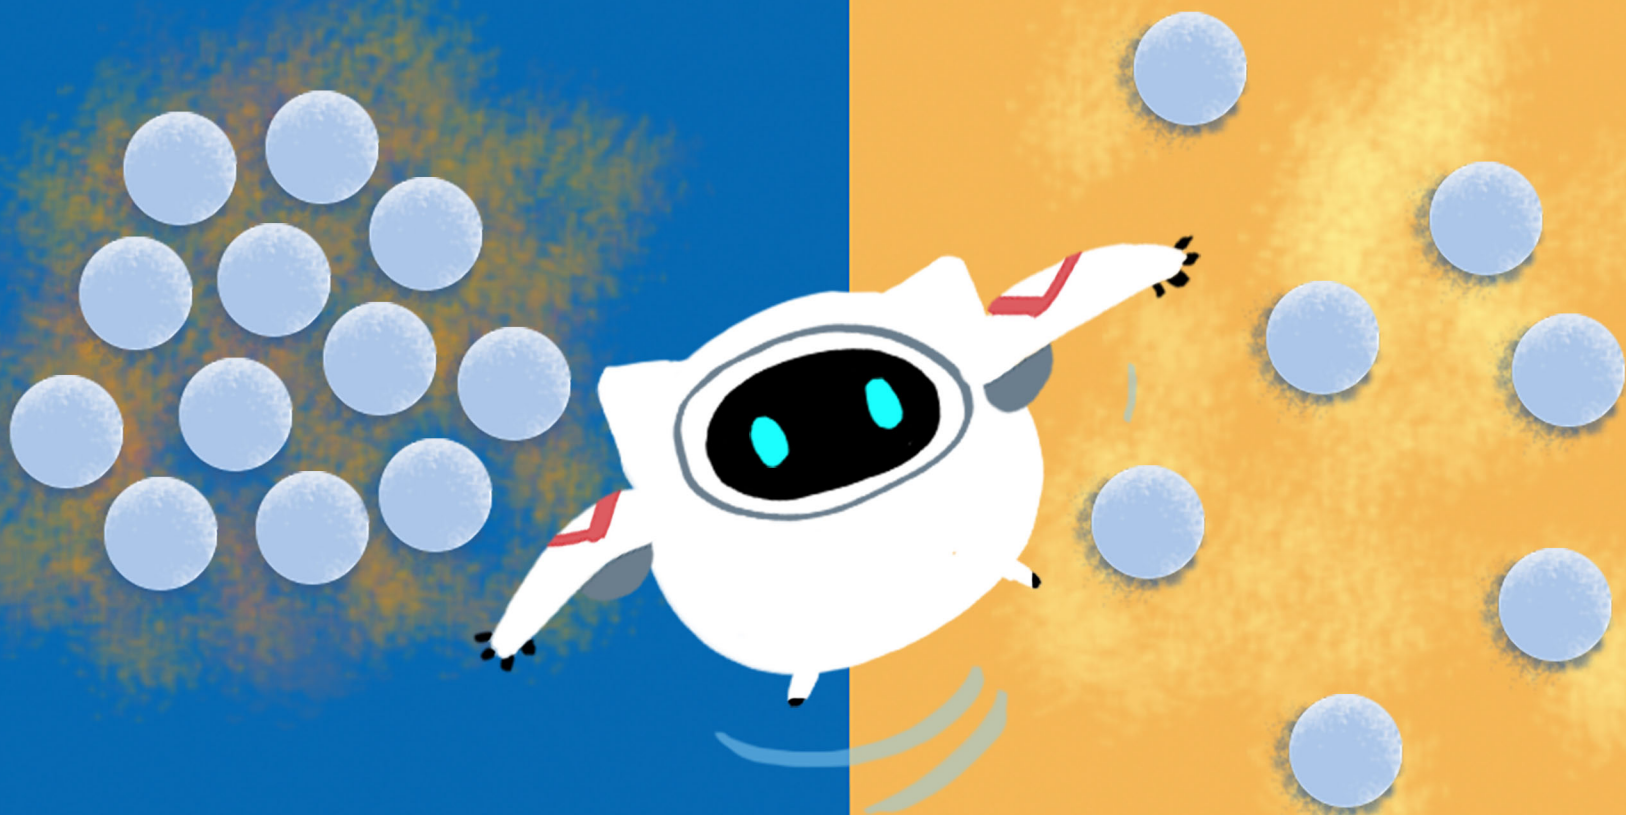

慢

原

高氣壓

低氣壓

macua ucani parana pi sipususua mainiisa siau'rucu mataingalu matumuhlua varatu ia, saparungahla langica manganu. macua parana kupi matumuhlua varatu ia saparungahla mikasukasu manganu.

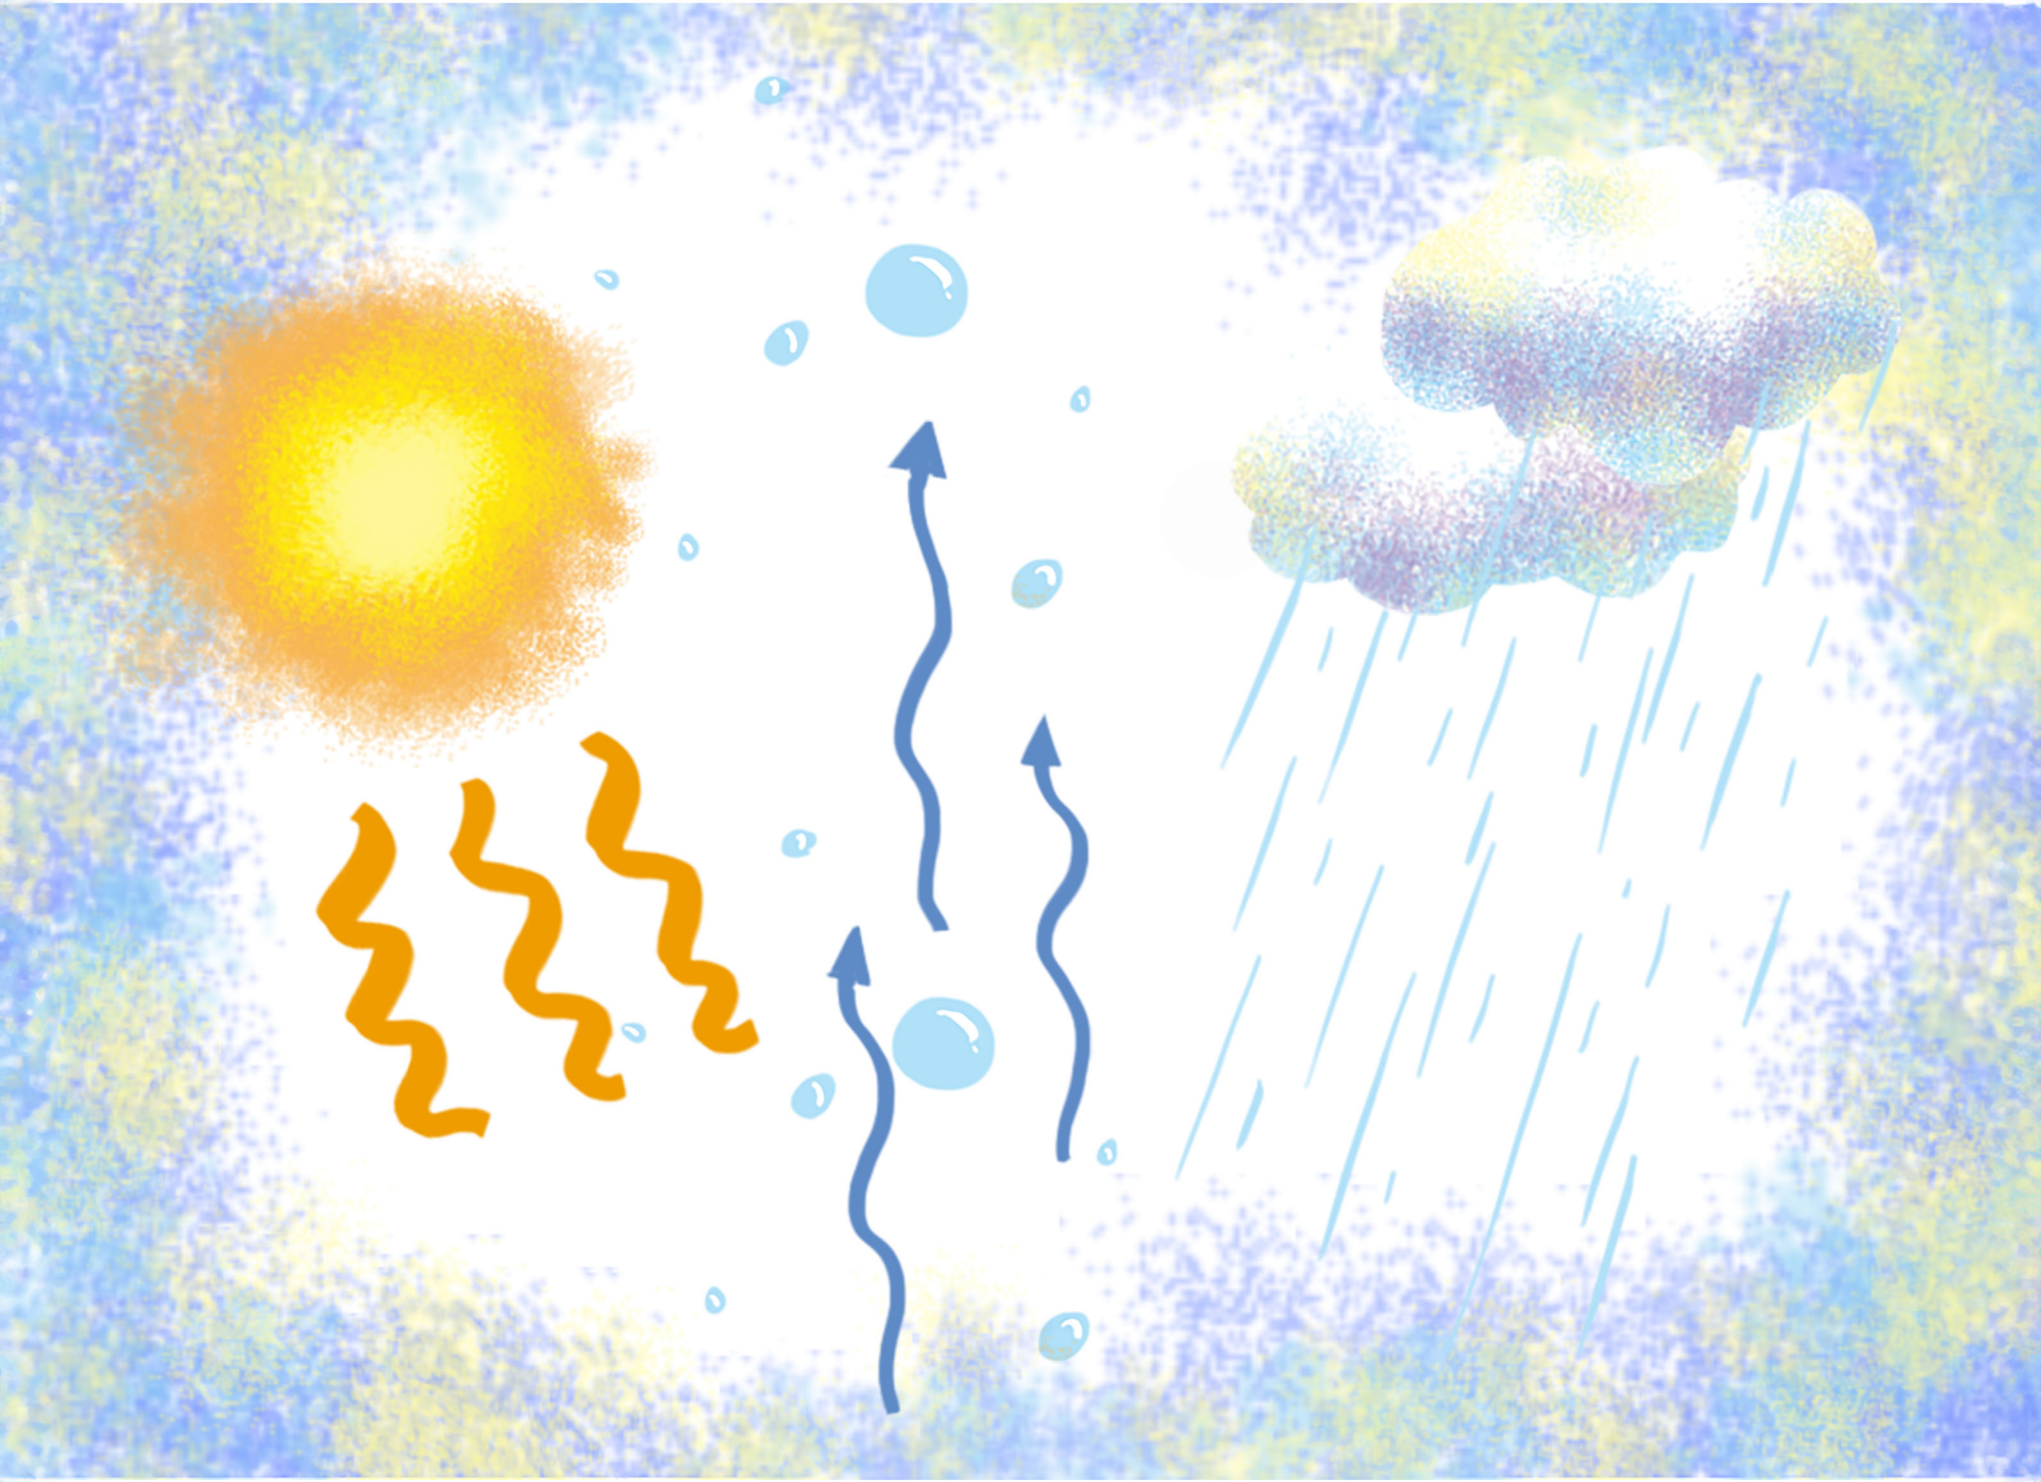

當一個地方空氣分子密度比較高的時候，叫做高氣壓。密度比較低的時候就叫做低氣壓。

When the air molecules in a place have a higher density, this is called high pressure. When the density is lower, it is called low pressure.

akuisa varatuna ta'iaraisaka sasahlia tahliaria ia aralangica siasungulina, papapuhla siliahluisa sipususua maini aralalangica, arakasukasua mara mikasukasua manganu, hlaa pariakuanu manganu ngutuangerunguru aralangica hla arakasukasua siasunguli, paratahlu kutuka usahu mara lulunga, matalakiahlu pakipuhlu sitakuamia umusahu.

當空氣因為太陽照射而提高溫度，分子的平均速率增加，密度減少而形成低氣壓，進而受到浮力上升降溫，使水氣凝結形成雲，容易出現下雨的情況。

When the air temperature becomes higher because of the sun's rays, the average velocity of the molecules increases and the air density decreases forming low pressure. In turn, the air floats upward and the temperature drops, causing water vapor to condense and form clouds, so that there is a high likelihood of rain.

慢

原

kani'i langicaisa Ivatas para'acangicu, taia'aimanai umausahlu?

Ivatas 的上空被雲層覆蓋了, 是不是快要下雨了呢?

Ivatas is covered in a cloud layer. Is it going to rain there soon?

tumacacurunua Apu tam mavacangua patuku tunumu! kani'i siakitana tamuucu langulangu kumakita maci ma Ruhlucu miararuma.

吉娃斯覺得 Ivatas 的海邊好美呀！這是在飛鼠(高中)部落很難看到的景色。

Giwas thinks the beaches on Ivatas are so beautiful! This scenery is something she doesn't often get to see living in Flying Squirrel Village.

慢

原

kihlamuhlamua Mai cucu'u m̄m̄m̄a. taiacu umausahlu, mairahlucu puaili salia.

si Masagaz 告訴大家，快要下雨了，該準備回家了。

si Masagaz tells everyone that it is going to rain soon, so it's time to go home.

pautaturua Mai ma masaihla hlialuvuna kihlamuhlamu : kana'a ia saliaku.
puhlamahlamama Apu kihlamuhlamu : tiaraisa saliauna mikasukasua?

「那就是我家。」si Masagaz 指著遠處的一個屋頂。「你家怎麼會這麼矮呀？」吉娃斯很好奇。

“That’ s my house.” si Masagaz says as he points to a roof. “Why is your house so low?” Giwas asks curiously.

kihlamuhlamua Mai cucu'u mɛmɛa : mariatara' ɥhla mɛcɛkɥhɥ lika'a
saliahlamu tahlana tau!

「歡迎來到我們達悟族的地下屋！」si Masagaz 對大家說。

“Welcome to a below ground house of the Tao people!” si Masagaz tells
everyone.

usuanganaiāu mairahlu lika'a salia ia mataingalū mikasukasū maci umahlīkua sasaruana, kuihlaisa ma lika'a sasaruana mairuruma salia.

原來地下屋其實是蓋得比地面還低的屋子，不是蓋在地下！

It turns out a below ground house is built lower than ground level, but not underground!

liliungaisa salia ihlaisa aruamia vatu'u acacani ngutuhlana rumarurutu sipailalungusa.

房子周圍有一層一層的階梯結構，並且鋪滿了鵝卵石。

Surrounding the house, there is a layered structure of steps covered with cobblestones.

patakuliacū tukua Hlatingai, cucuvana maci umusahlu ia, sapara parana makahlangulua lika'a saliana?

里昂很擔心，等一下要是下雨了，地下屋不就變成游泳池了嗎？

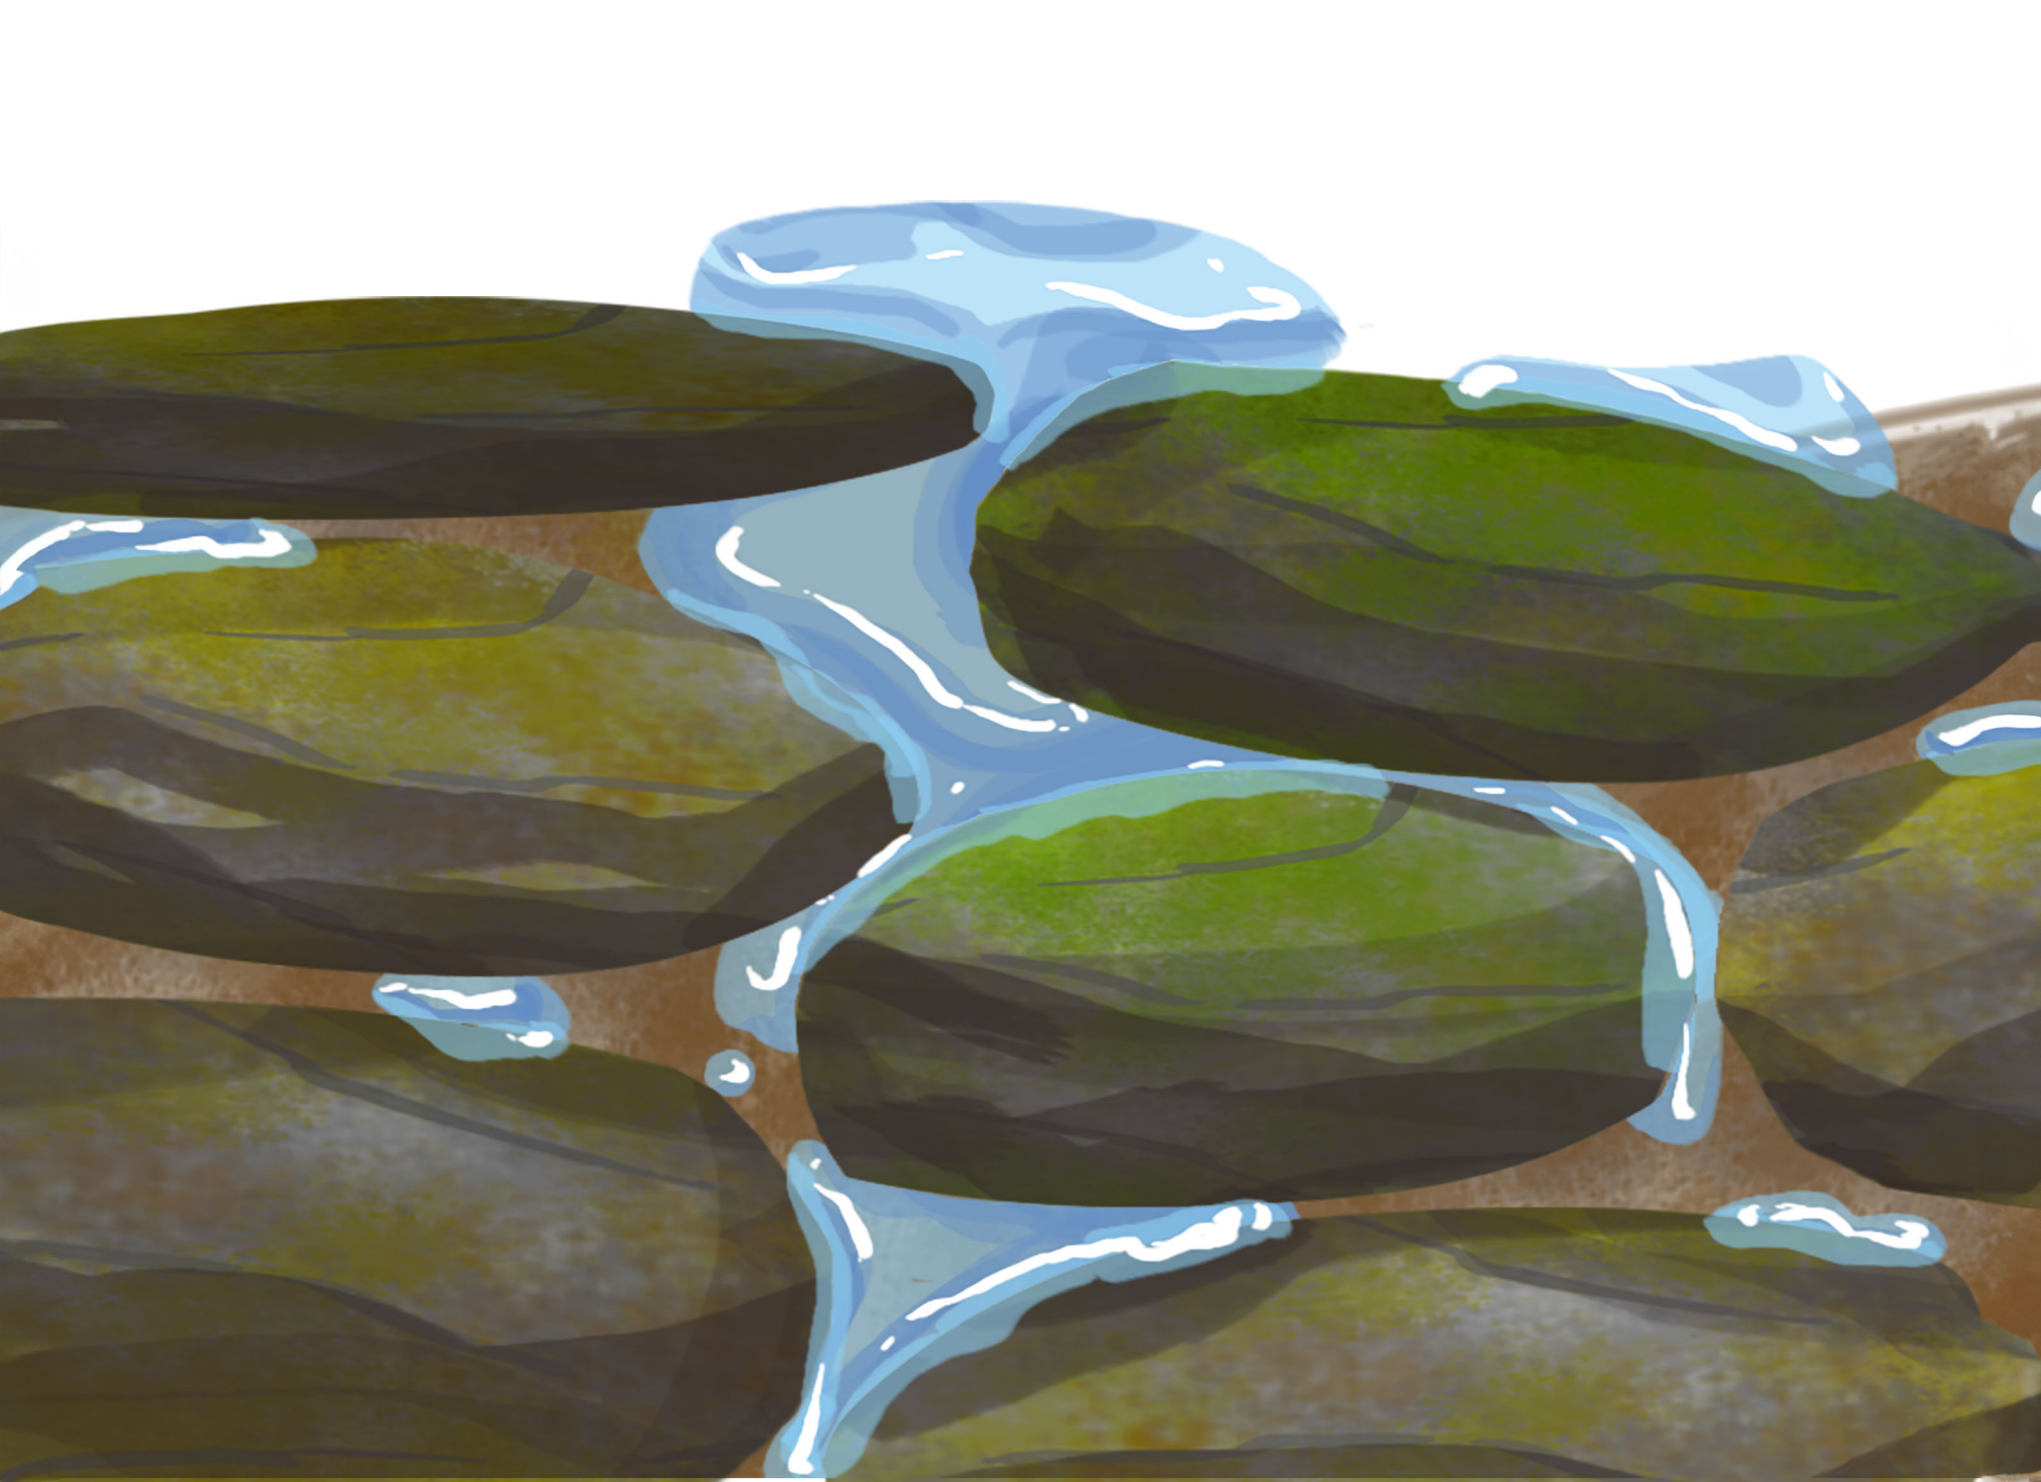

Leon is worried that if it starts raining soon, the below ground house will turn into a swimming pool.

慢

原

kukiiia takuliacu tükü! tahluruisa watu'u nua watu'una matuatuaahlu apusala sahlumu. kutuaahlu sahlumuna tarikipucu ma lika'a salia.

不用擔心！鵝卵石和鵝卵石之間的縫隙剛好可以排水。水不會累積在地下屋。

There's no need to worry! The spaces between the cobblestones are perfect for water drainage, so water doesn't accumulate in the below ground house.

sahlumuna angahli acacani ngutuhlana parana mikasukasu musasala, ulavaisa tumua angahli parana apusala sahlumuisa lika'a salia kipuhlu, kani'ina ia sipacucurunguisa lika'a salia.

水從一層一層的結構往下流動，最後就會從地下屋的排水口流出去，這就是地下屋的智慧。

The water flows downward from the layered structure and finally flows out from the drainage hole next to the below ground house. This is the wisdom of the below ground house.

aucaucani sipatalauliaisa lika'a saliana, aucaucani vatu'u, rianu ia amaisa
Mai na takacihli tiapili hla taraivu.

地下屋的每一根柱子，每一塊石頭，都是 si Masagaz 的父親親自挑選和搬運的。

Every column and stone of the below ground house was selected and
moved here by si Masagaz' s father.

amihla Mai, maci arataisa ia kana'ana tumua татна maicacani mairuruma
ucani tam pi sipacucurungua lika'a salia.

si Masagaz 說, 他長大也要蓋一座有智慧的地下屋。

si Masagaz says, when he is older, he wants to build a wisely designed
below ground house too.

umusahlicu! cucutahlana Tau naia ihlaises tahlana maruaru tənəm, tam macahlia Mai sitacacurunaisa sitakuamia langica maci aparaiahlə sipatakuacahlia langica.

下雨了！達悟族人是海洋民族，si Masagaz 對天氣的預感比氣象預報還準呢！

It starts raining! The Tao people are a people of the ocean, so si Masagaz' s weather predictions are even more accurate than weather reports!

慢

原

ahlaluaisa Hlacaahlü kani'i Mai tumaluluvu cusu'u muma pakipuhlu
hliavavaisa takacihli.

si Masagaz 的表姊 si Mazngang 替大家端上拿手好菜。

si Masagaz' s cousin si Mazngang brings out the delicious food she cooked
for everyone.

amaisa Mai na m̄t̄uat̄ahl̄ m̄m̄a puailicu salia.

si Masagaz 的父親也剛好回家了。

si Masagaz' s father has also just come home.

manacu! aucaucani camaina rianu tam sa'au!

開飯囉！每一道菜都好美味呀！

It's time to eat! Every dish is so delicious!

hlatumua Aruna piavavacangu maluliri, hlaa pausu'ulua cucu'u mɛmɛa rianɛ pi tɛkɛ umau uuru, uka'a cucu'u arupakakari.

吉娃斯想要開口稱讚，卻發現大家都專心吃著飯，沒有人在閒聊。

Giwas wants to compliment the food, but she notices that everyone is so focused on eating that no one is chatting.

ta'iaraisaka cucutahlana Tau maci umau uuru ia pi taku umau uuru, maci tumua maluliri ia, tumua kukukucu uuru ia aniciki tuahla maluliri.

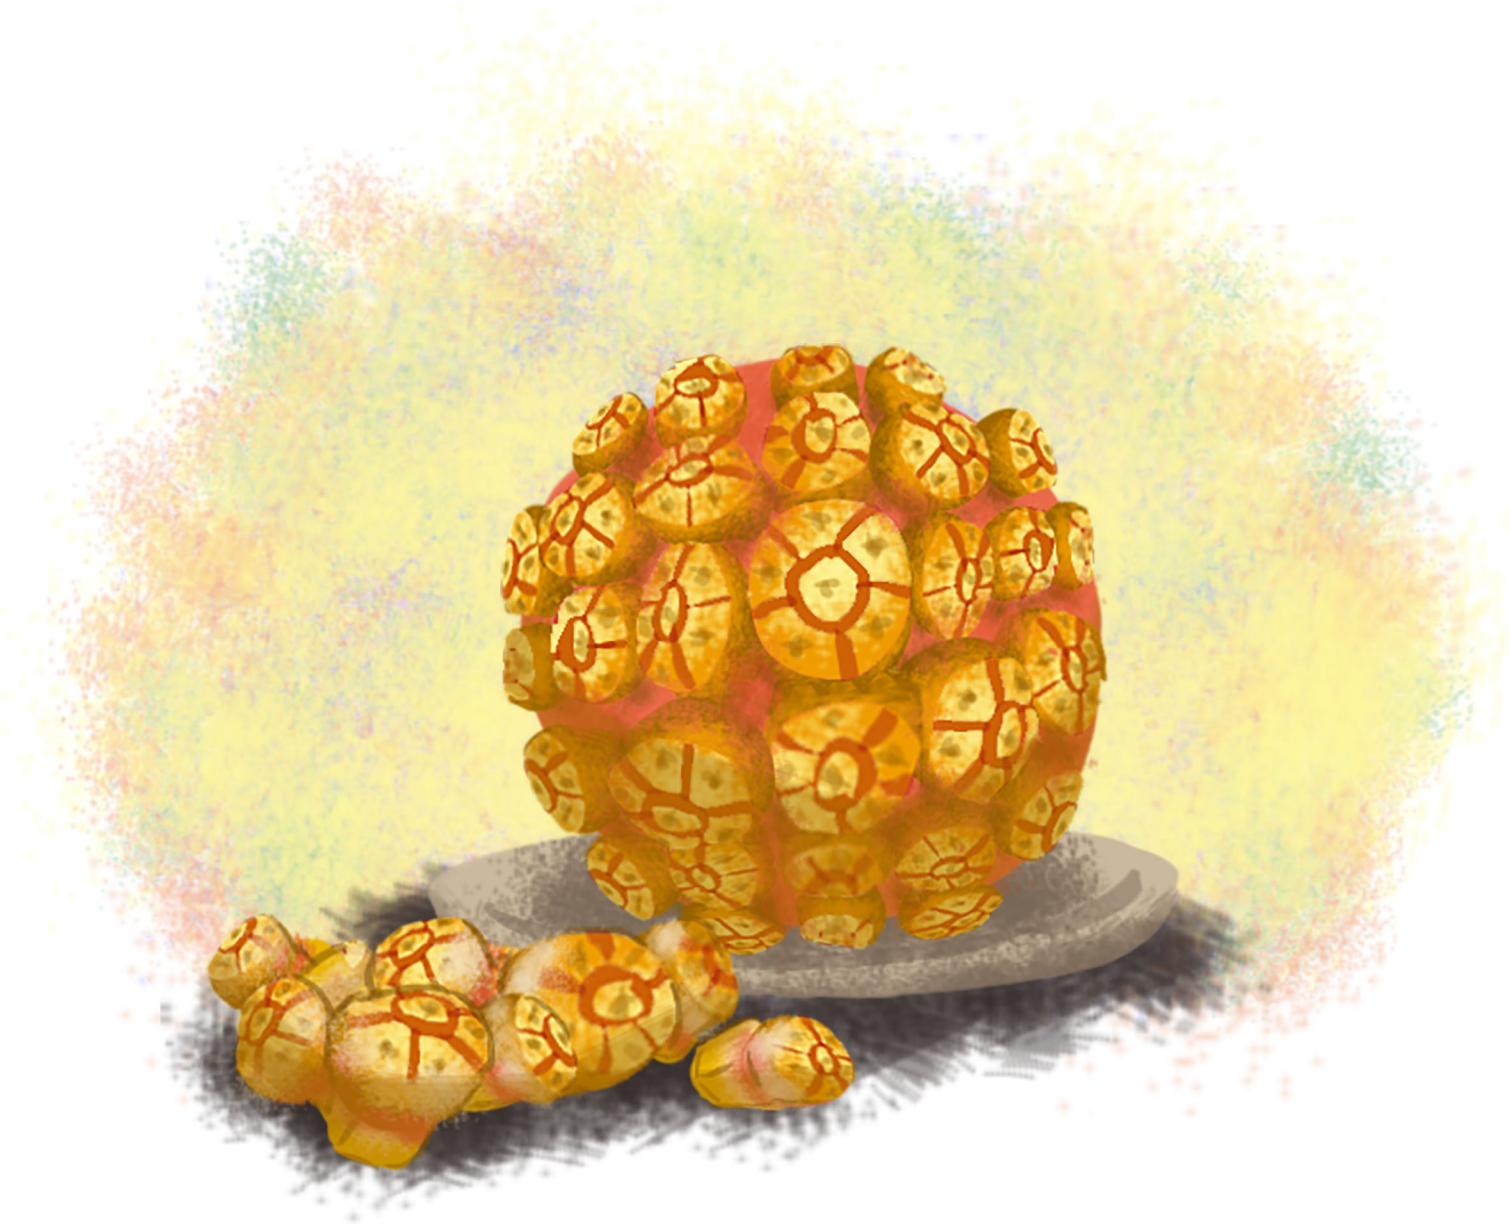

因為達悟族人吃飯就是吃飯，想要說話的話，要等吃完飯才能說呢。

That is because when Tao people eat, they focus on eating. If they have something to say, they wait until after eating to say it.

maci kukucu ia marumana masukiu'u 林投果 tuahlɛ umuu,
apuhlamahlamaɲa sucu'u mɛmɛa.

飯後還有新鮮的林投果可以吃，大家都覺得好新奇。

After their meal, there is fresh screwpine fruit to eat, which is a novel treat for the guests.

慢

原

minisua tuahlicu maluliri. piatataisa vahliungua Apu kihlamuhlamu,
tamuucu sa'aua hliumuu kicuvanana!

總算可以說話了。吉娃斯大聲地說剛才的食物真的好好吃！

Now that they can finally speak, Giwas loudly exclaims that the food was
so delicious!

kiahlahlamua Mai Apu, sikilaliali vutukuhlu miapihlihliina taiacu ruamia, maci miaungucu ia taturu maaru sa'aua vutukuhlu miapihlihli tuahlu umuu.

si Masagaz 告訴吉娃斯, 飛魚季就要開始了, 到時候就有好吃的飛魚可以吃了。

si Masagaz tells Giwas that the flying fish season is about to start, which means soon there will be delicious flying fish to eat.

慢

原

kihlamuhlamua Vaasu tumua mamua umuu. tam masasangarua pasamiaisa
kuaruvaruvana arinani.

乃奈也吵著要吃。今天的晚餐真是太歡樂了。

Nainai wants to try some too. Everyone shared such a happy meal today!

慢
