第02集 智慧地下屋

## 阿美族語 (秀姑巒阿美語)

族語全文朗讀

華語全文朗讀

英語全文朗讀

吉娃斯

Kolas

飛卉

Mayaw

乃奈

Namoh

里昂

Ci Lisaw

I mikilaenoay to sera^ a loma'

智慧地下屋

The Wisdom of the Below Ground House

慢

原

Tatiih! Tatiih! Lekal sa ci Mayaw.

不好了!不好了!飛奔大喊著。

Oh no! Oh no! Behuy yells out.

'Araw han i, tahiraay i tatihi^ no 'oriraw koya Riyok a tay-kung-can, orasaka caay ka 'araw ni Mayaw koya katayraan ni Kolas a Ivatas.

原來是因為 Ryuk 太空站已經來到地球的另一側，所以飛卉看不到吉娃斯拜訪的 Ivatas 了。

The Ryuk Space Station has traveled to the other side of the earth, so Behuy can't see Ivatas where Giwas is visiting.

慢

原

Warawarahan, ma'araw ho^ koya Ivatas, pakayni i nisyasingan nani maeferay a fo'is.

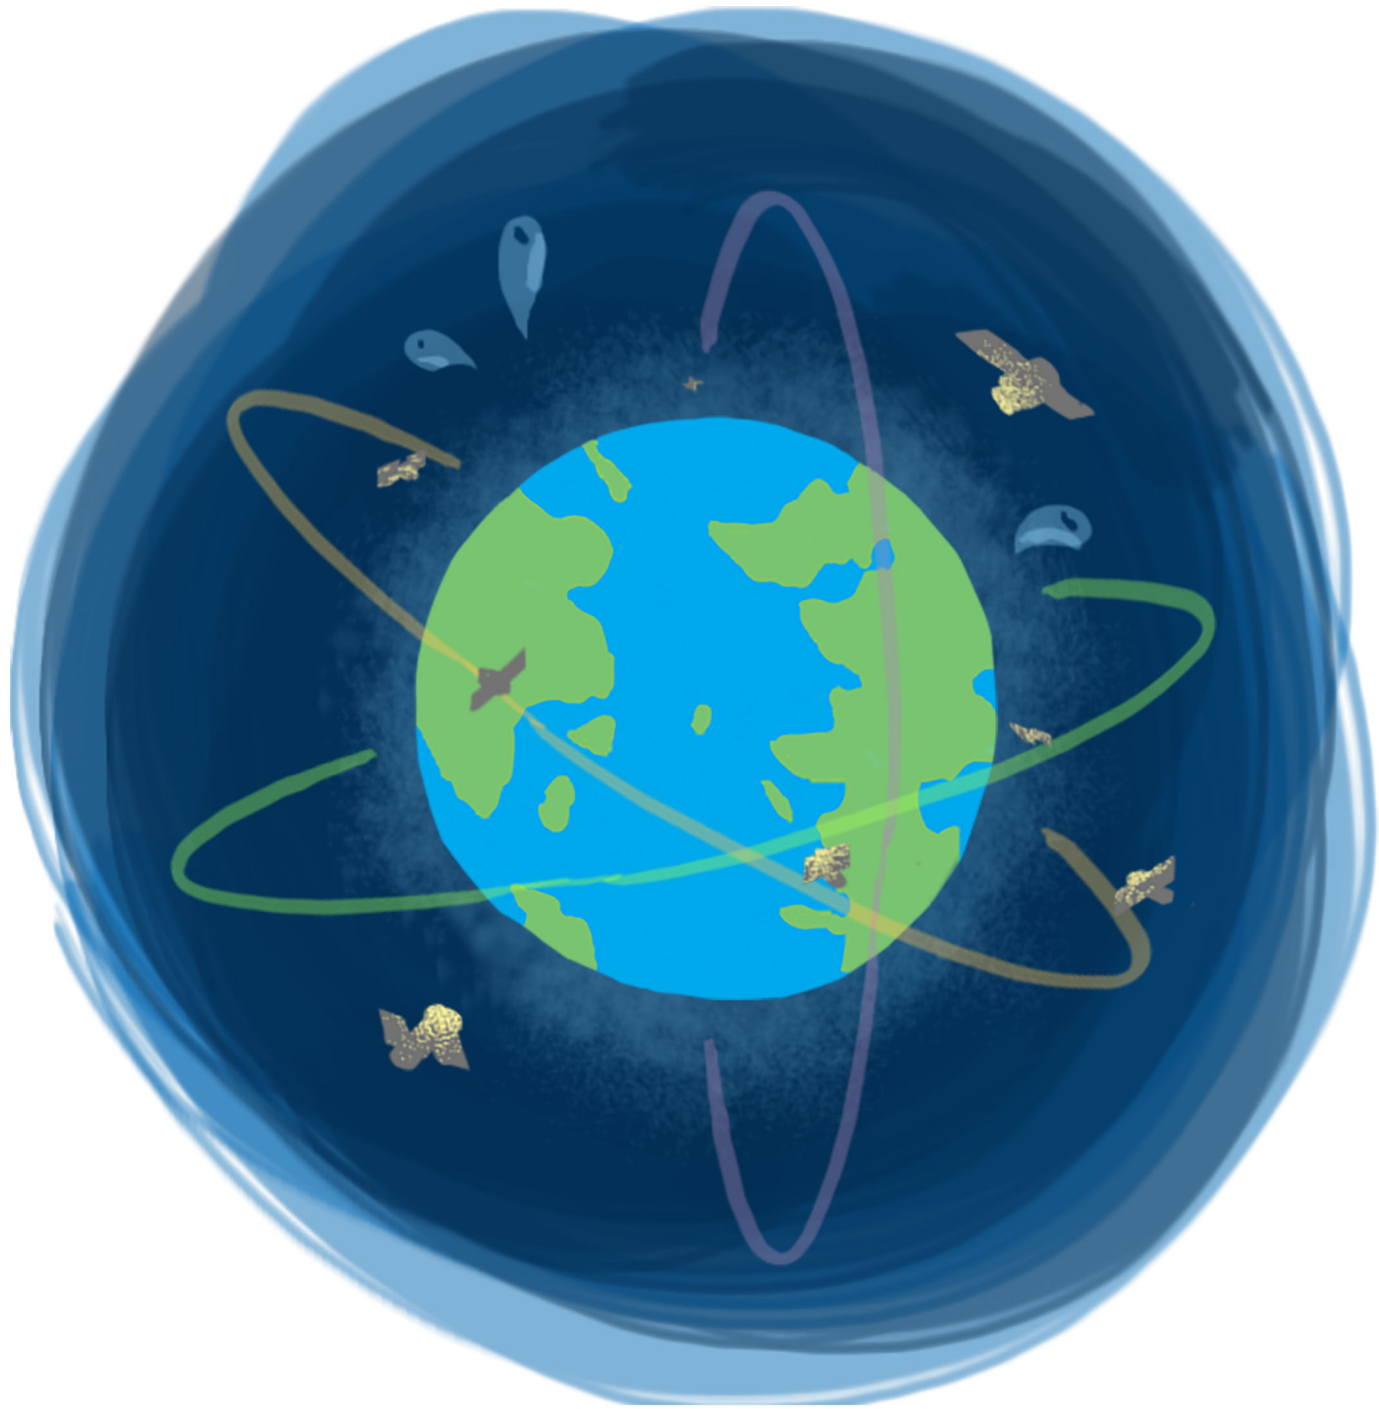

幸好，還可以從衛星拍攝的照片觀察Ivatas。

Luckily, he can still observe Ivatas from satellite images.

Nawhani, oya ci-syang-wey-sing haw i, o nipakakafitan to adihayay a nipaeferan a fo'is i taliyok no 'oriraw, saka manga'ay a maditek ko pinangan no romi'ad i cowaco:wa^ no 'oriraw.

因為氣象衛星是由許多顆衛星共同組成，散佈在地球的周圍，可以探測到地球每一個地方的天氣。

Meteorological satellite systems are made up of many satellites scattered all around the earth so that they can detect the weather in every part of the earth.

慢

原

O roma^ sato, macakat to ko ki-zic, caay to paka'ading ko cahid ato 'o'ol to laleko^ no maeferay a fo'is, masapi:nang ko kaitiraan no kaw-ci-ya ato ti-ci-ya.

而且因為技術的進步，衛星可以不受雲層或水氣的影響，更能準確判斷高氣壓與低氣壓的位置。

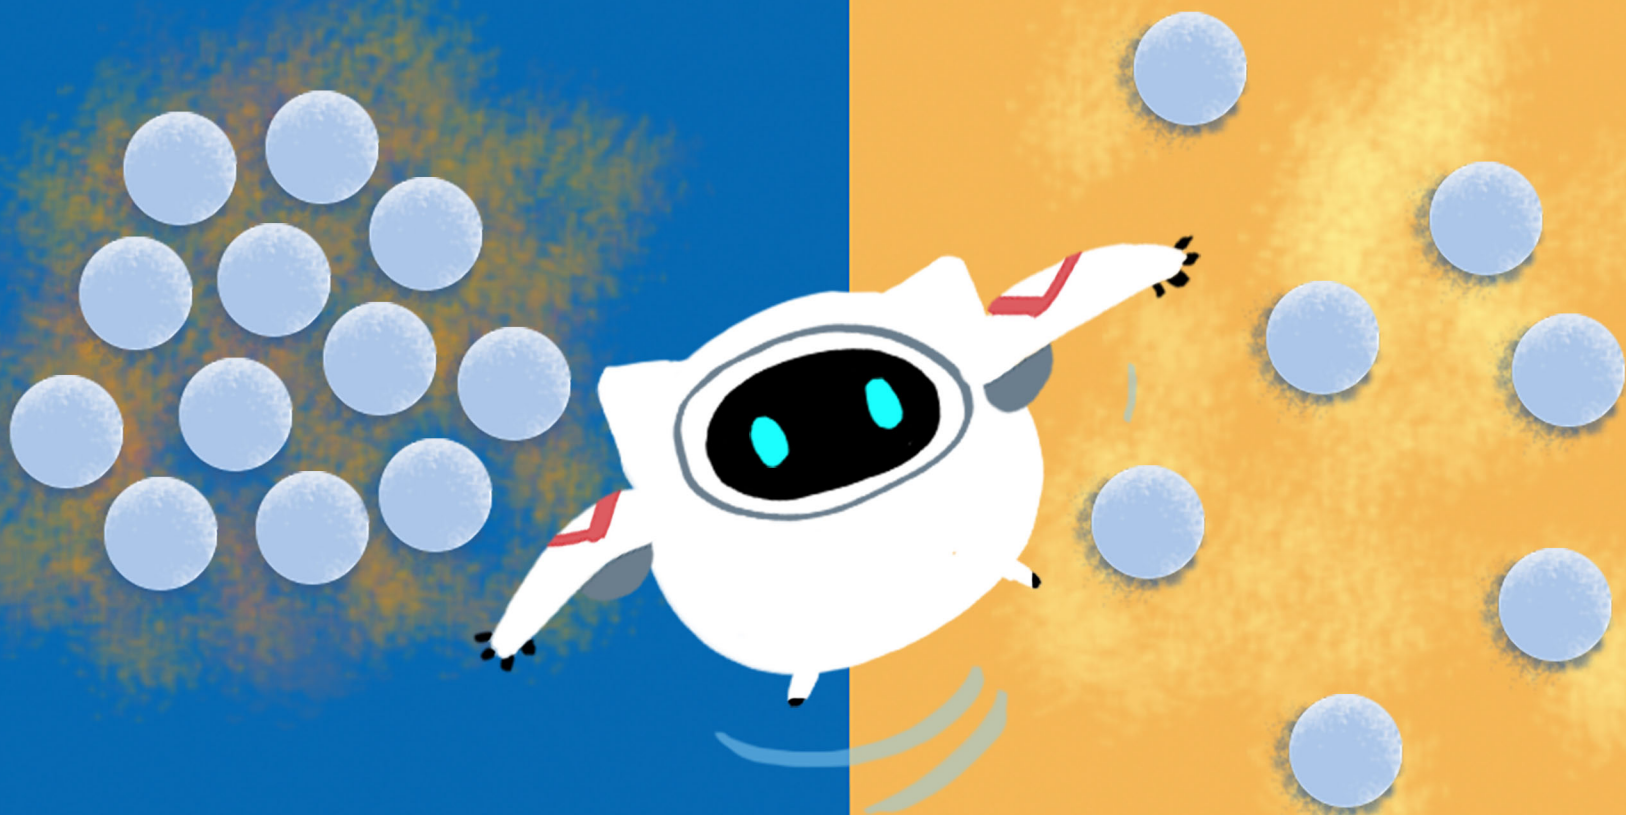

Furthermore, because of improvements in technology, satellites are not affected by cloud cover and moisture so they can accurately determine the location of high pressure systems and low pressure systems.

高氣壓

低氣壓

Yo makedec ko rafor no fali^ i kakayrayan haw i, o kaw-ci-ya han kora;  
oya caayay ka kedec ko rafor no fali^ i kakarayan haw i, o ti-ci-ya han  
kora.

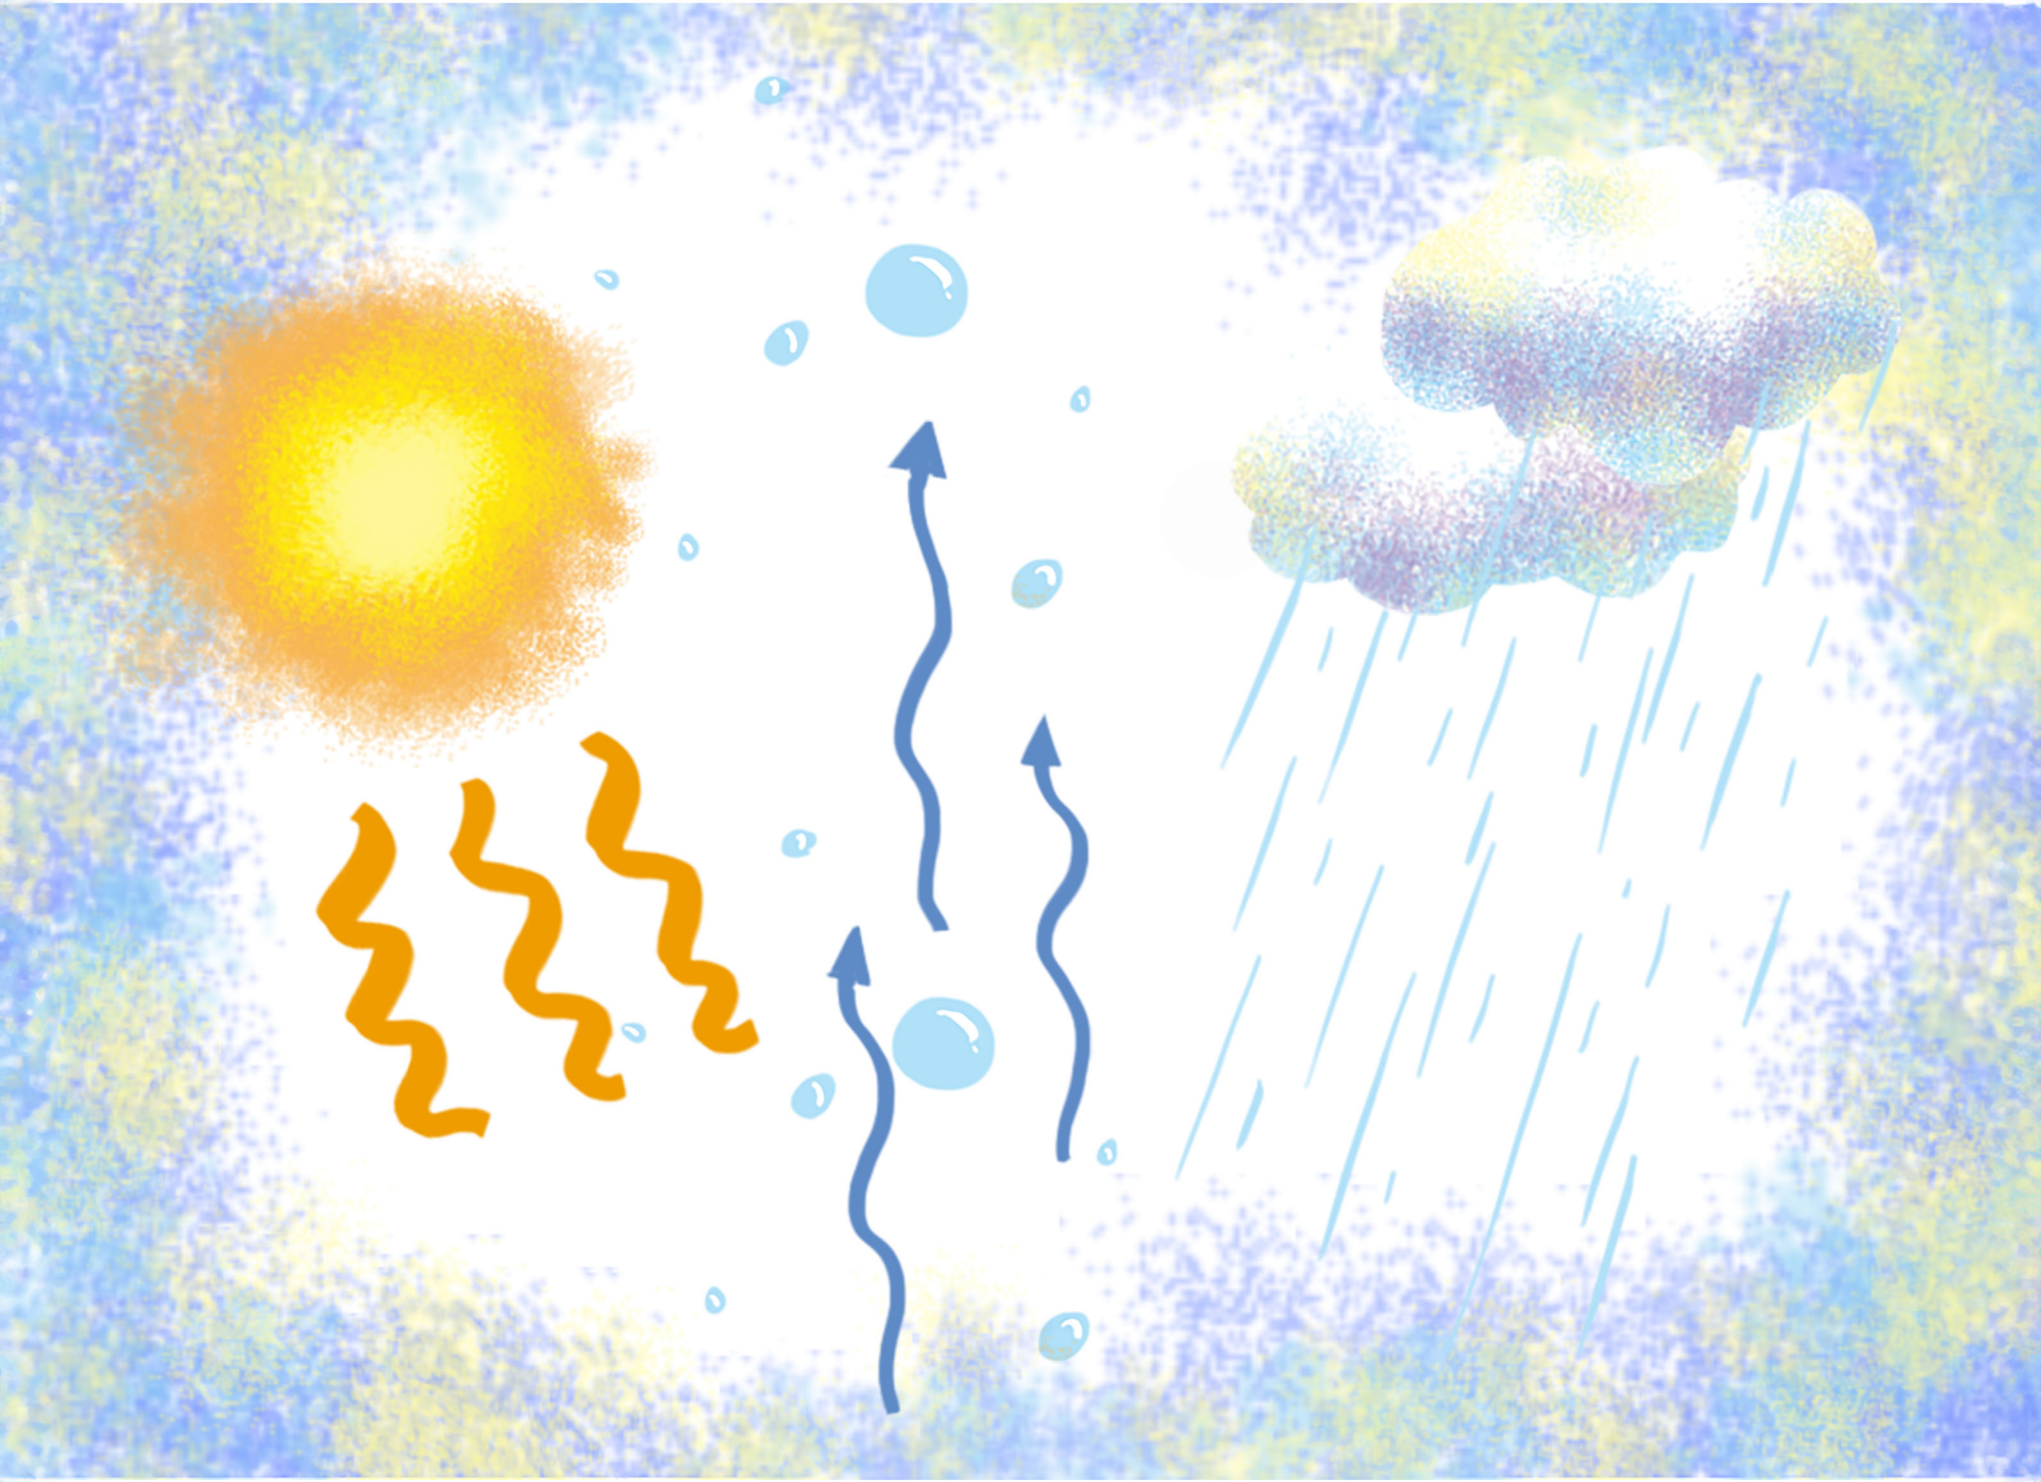

當一個地方空氣分子密度比較高的時候，叫做高氣壓。密度比較低的時候就叫做  
低氣壓。

When the air molecules in a place have a higher density, this is called high  
pressure. When the density is lower, it is called low pressure.

Yo macakat ko faedet no fali^ na mapacidal i, takenay ko rakat no rafor no fali^, caay ka kedec ko fali^, saka mala o ti-ci-ya; o roma^ sato, mapacakat noya mifawfaway a 'icel koya faedetay fali^ i kakarayan, mafasaw ta malo'itad a malacahid, matira saka rahoday a ma'orad ko romi'ad.

當空氣因為太陽照射而提高溫度，分子的平均速率增加，密度減少而形成低氣壓，進而受到浮力上升降溫，使水氣凝結形成雲，容易出現下雨的情況。

When the air temperature becomes higher because of the sun's rays, the average velocity of the molecules increases and the air density decreases forming low pressure. In turn, the air floats upward and the temperature drops, causing water vapor to condense and form clouds, so that there is a high likelihood of rain.

Matahepo^ to no to'emanay a kotem koya Ivatas, saka o mama'orad to hakiya?

Ivatas 的上空被雲層覆蓋了, 是不是快要下雨了呢?

Ivatas is covered in a cloud layer. Is it going to rain there soon?

Fangcalen ci Kolas to lawac no riyar no Ivatas! Caay ka 'araw ko matiniay i Niyaro' no Lawal.

吉娃斯覺得 Ivatas 的海邊好美呀！這是在飛鼠部落很難看到的景色。

Giwas thinks the beaches on Ivatas are so beautiful! This scenery is something she doesn' t often get to see living in Flying Squirrel Village.

慢

原

Sawal sa ci Masa^, “Mama’orad to ko romi’ad, tataloma’ to kita!” saan.

si Masagaz 告訴大家，快要下雨了，該準備回家了。

si Masagaz tells everyone that it is going to rain soon, so it’s time to go home.

Mitoro' ci Masa^ toya maraa:yay a fadahong no loma', "O loma' ako kora." saan. Ca'of sa ci Kolas, "Nawiro poe:ner ko loma' iso?" han ningra.

「那就是我家。」si Masagaz 指著遠處的一個屋頂。「你家怎麼會這麼矮呀？」吉娃斯很好奇。

"That' s my house." si Masagaz says as he points to a roof. "Why is your house so low?" Giwas asks curiously.

“Tata! Tayraa ho^ i mikilaenoay to sera^ a loma’ no Fotod a finacadan.”  
Han ningra ko ’alomanay.

---

「歡迎來到我們達悟族的地下屋！」si Masagaz 對大家說。

---

“Welcome to a below ground house of the Tao people!” si Masagaz tells everyone.

Hilam kipoeneran no i mikilaenoay to sera^ a loma' ko i faleday no sera^ a loma', caay ka i lalo:ma' no sera^ ko pipatireng!

原來地下屋其實是蓋得比地面還低的屋子，不是蓋在地下！

It turns out a below ground house is built lower than ground level, but not underground!

I taliyaok no loma', ira ko cecace:cay a tongroh no ni'atolan to fakeloh,  
o si'elac ko sapi'atol.

房子周圍有一層一層的階梯結構，並且鋪滿了鵝卵石。

Surrounding the house, there is a layered structure of steps covered with  
cobblestones.

慢

原

Hinapec ko faloco' ni Lisaw, o mama'orad to anohoni^, alalek malafanaw to kona loma' saan.

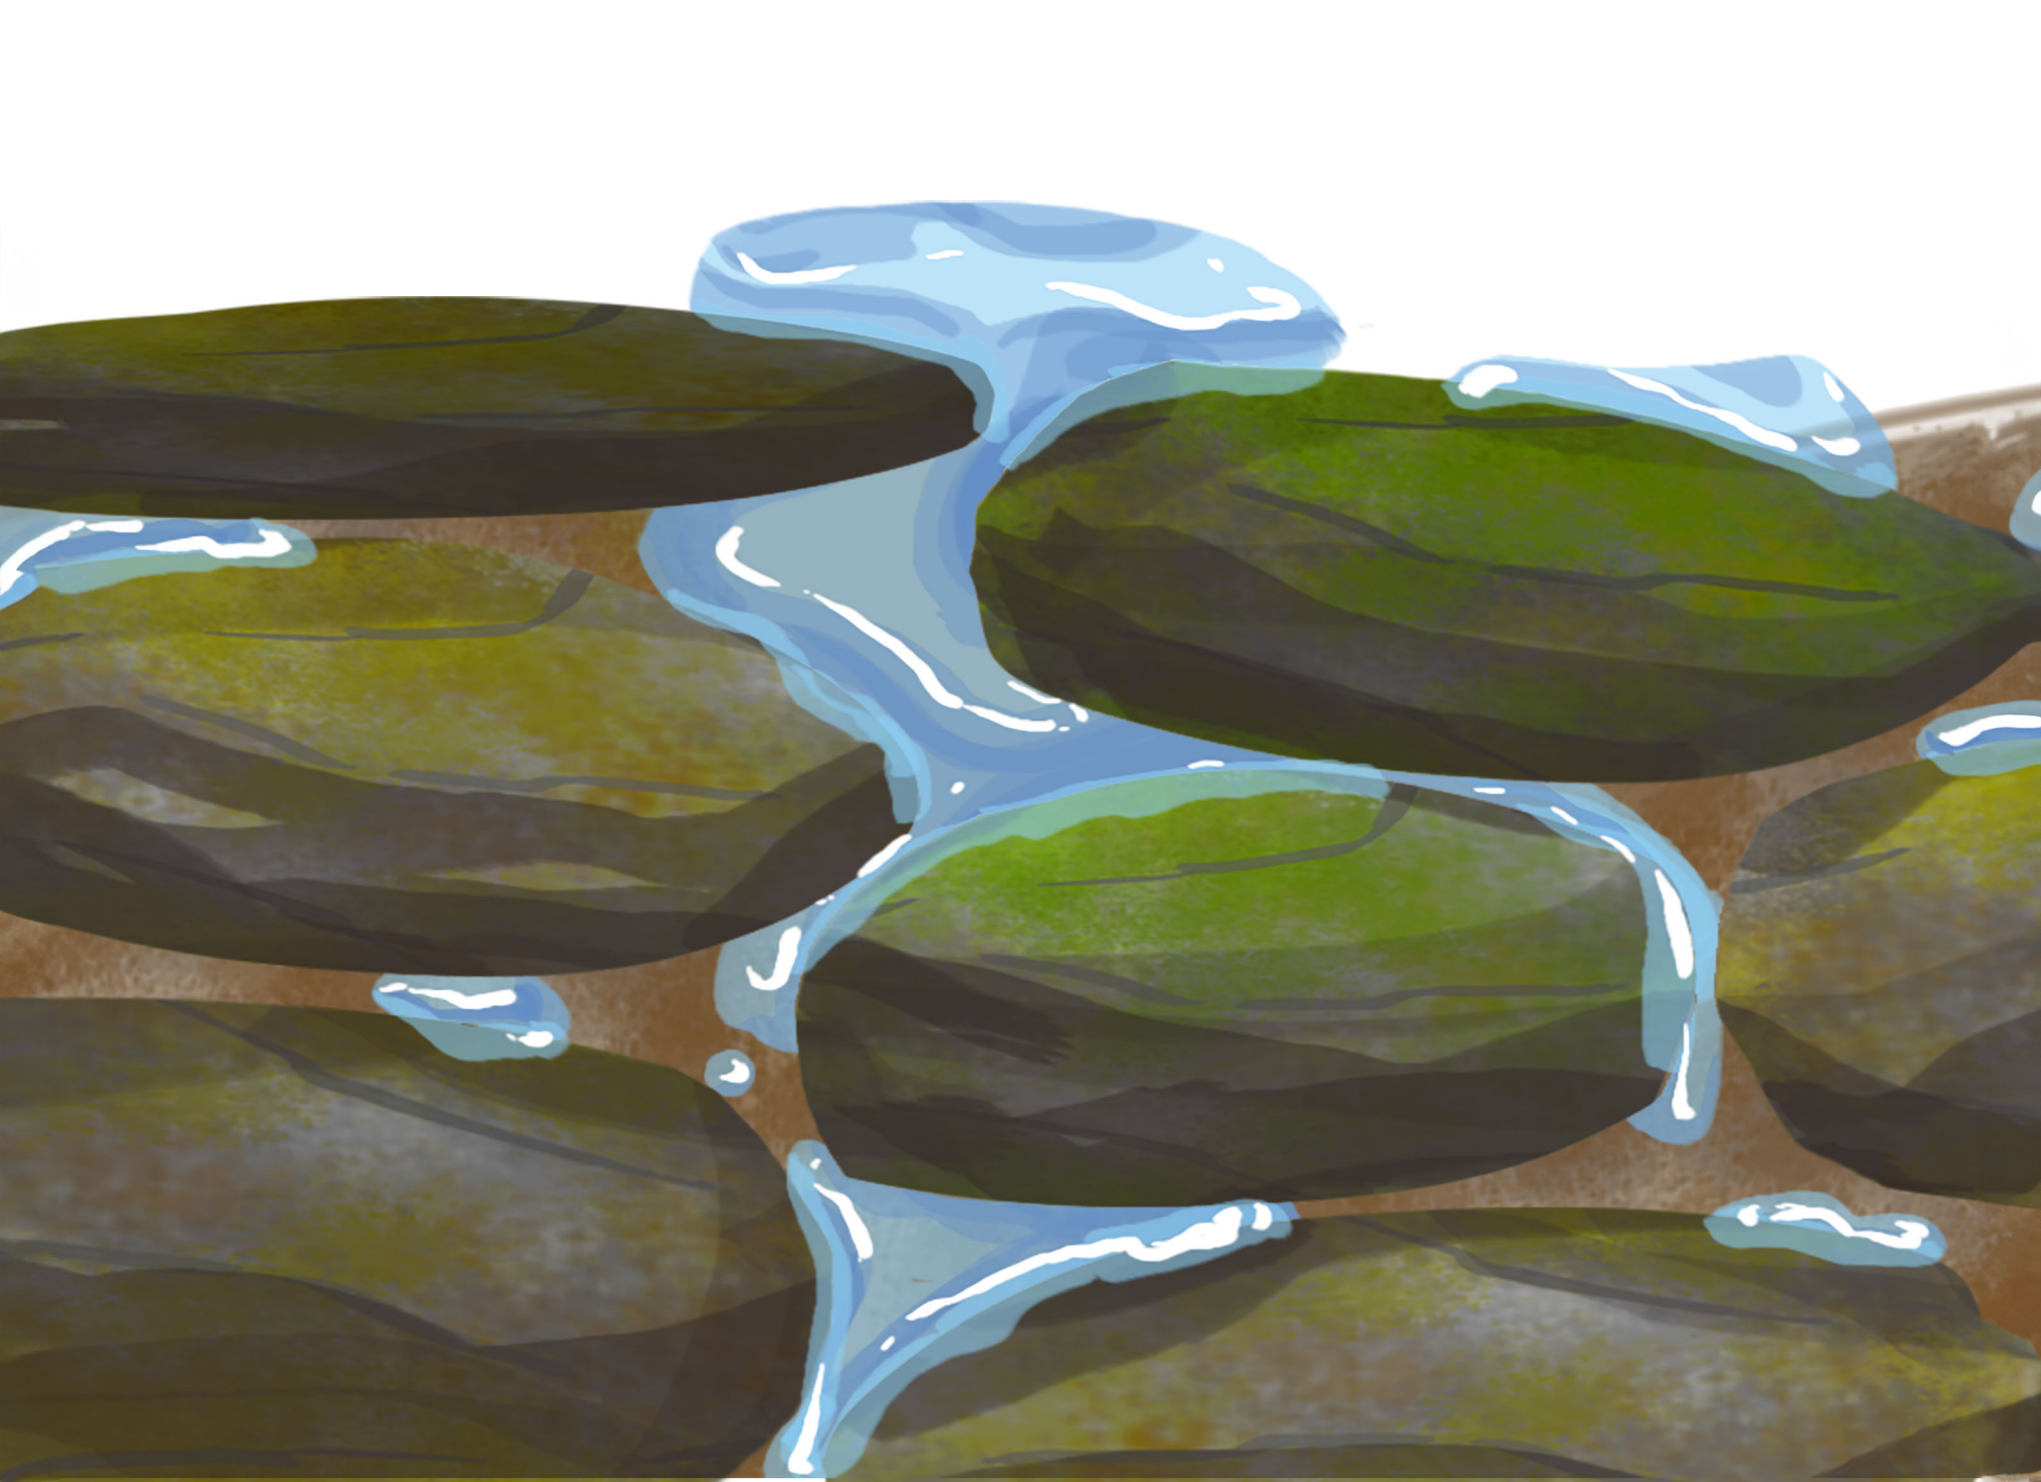

里昂很擔心，等一下要是下雨了，地下屋不就變成游泳池了嗎？

Leon is worried that if it starts raining soon, the below ground house will turn into a swimming pool.

Aka ka hinapec! I la'ed no si'elac haw i, ira ko ngala' o malo pilaliwan no nanom. Caay ka sarad ko nanom itini tona loma'.

不用擔心！鵝卵石和鵝卵石之間的縫隙剛好可以排水。水不會累積在地下屋。

There' s no need to worry! The spaces between the cobblestones are perfect for water drainage, so water doesn' t accumulate in the below ground house.

慢

原

Masonol ko nanom pakayra i kasatongrongroh, ikor to i, masadak ko nanom pakayra i kasadakan, o taneng no pisanga' to mikilaenoay to sera^ a loma' konini.

水從一層一層的結構往下流動，最後就會從地下屋的排水口流出去，這就是地下屋的智慧。

The water flows downward from the layered structure and finally flows out from the drainage hole next to the below ground house. This is the wisdom of the below ground house.

O kahacecacecay no tartar, kahacecacecay no fokeloh i, o nipili'an no mama^ ni Masa^ a micolo'.

地下屋的每一根柱子，每一塊石頭，都是 si Masagaz 的父親親自挑選和搬運的。

Every column and stone of the below ground house was selected and moved here by si Masagaz' s father.

O sowl ni Masa^, ano mato'as to cingra i, o mamipatireng cingra to mikilaenoay to sera^ a loma'.

si Masagaz 說，他長大也要蓋一座有智慧的地下屋。

si Masagaz says, when he is older, he wants to build a wisely designed below ground house too.

Ma'orad to! O i riyaray ko 'orip no i Fotoday a finacadan, saka kitahenayan ni Masa^ ko piparatoh no pali'ayaway to pinangan no romi'ad yo!

下雨了! 達悟族人是海洋民族, si Masagaz 對天氣的預感比氣象預報還準呢!

It starts raining! The Tao people are a people of the ocean, so si Masagaz' s weather predictions are even more accurate than weather reports!

慢

原

O kaka^ ni Masa^ to fafahian ci Maya^, pataheka^ to 'aredetay a sikaen.

si Masagaz 的表姊 si Mazngang 替大家端上拿手好菜。

si Masagaz' s cousin si Mazngang brings out the delicious food she cooked for everyone.

Na matira, taloma' saho^ ko mama^ ni Masa^.

si Masagaz 的父親也剛好回家了。

si Masagaz' s father has also just come home.

Malafi^ to! 'Aredetay a maemin kona sikaen ita!

開飯囉！每一道菜都好美味呀！

It' s time to eat! Every dish is so delicious!

Tona mihemek ci Kolas toya sikaen, nika paytemek sa a maemin a malafi^, awaay ko cinglaway.

吉娃斯想要開口稱讚，卻發現大家都專心吃著飯，沒有人在閒聊。

Giwas wants to compliment the food, but she notices that everyone is so focused on eating that no one is chatting.

O nanam no i Fotoday a tamdaw i, ano mitaheka^ i, caay ka cinglaw. Ano mangalay a cinglaw i, itiya sato i herek to no taheka^.

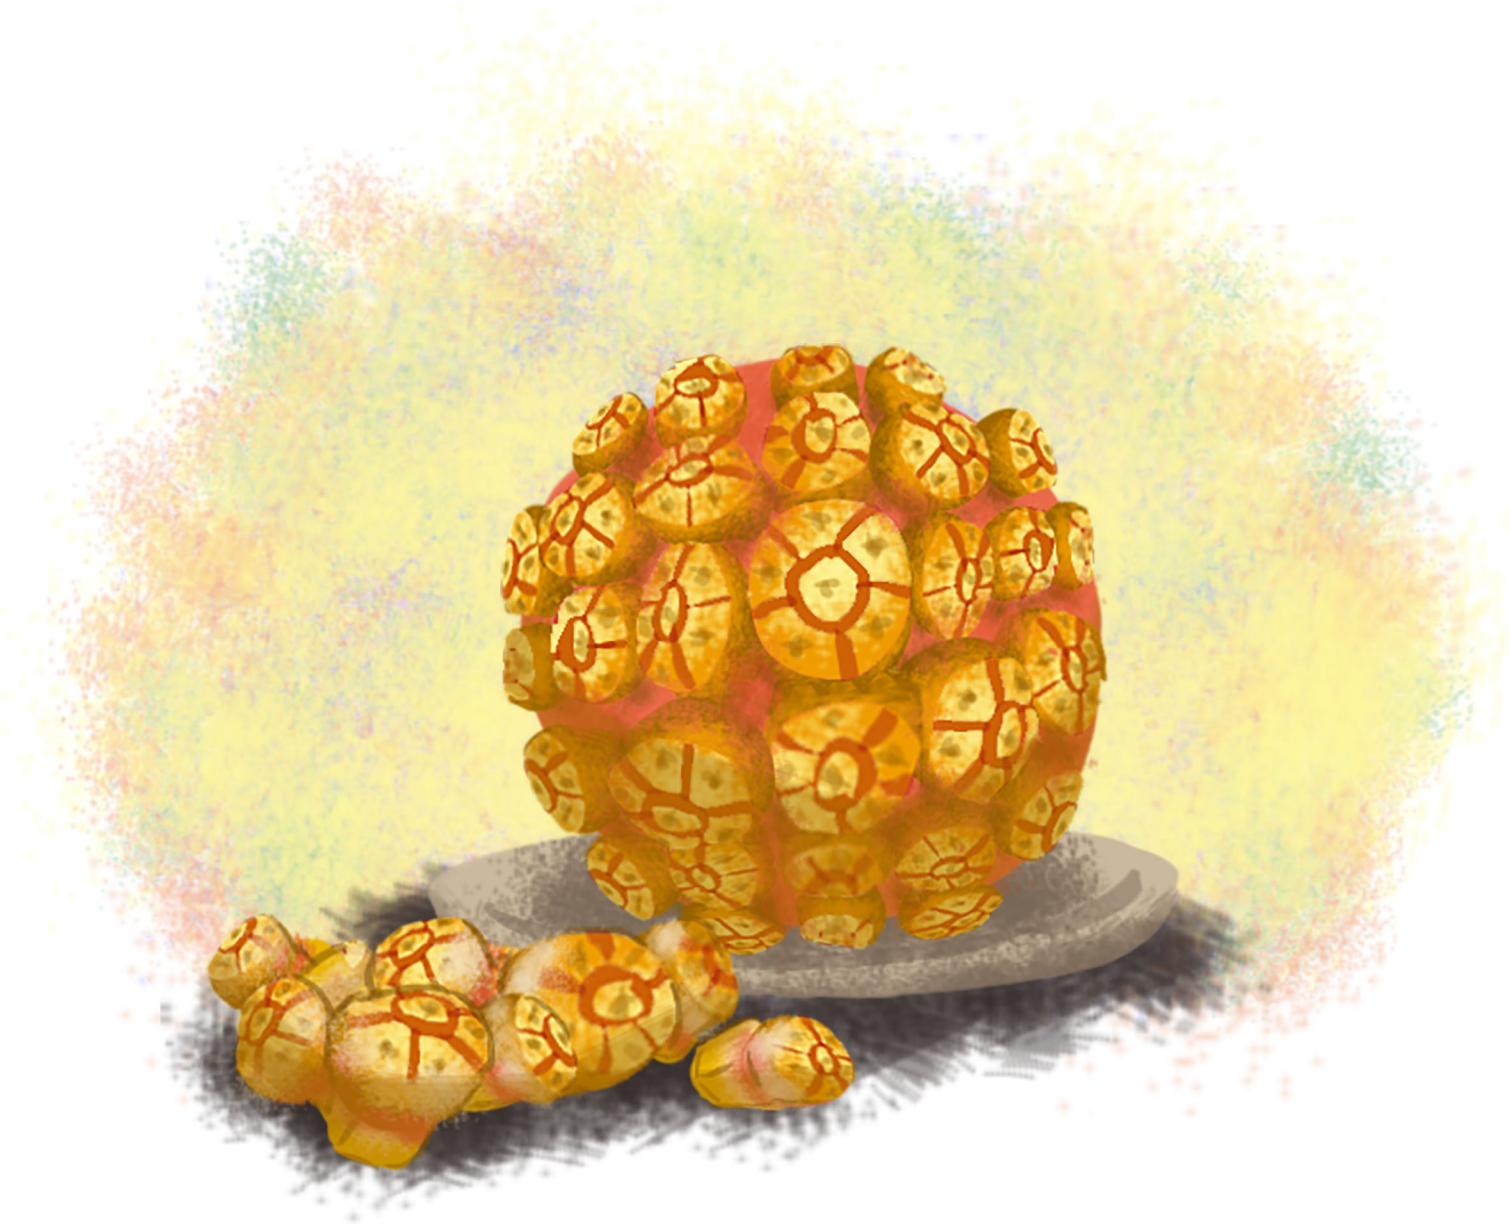

因為達悟族人吃飯就是吃飯，想要說話的話，要等吃完飯才能說呢。

That is because when Tao people eat, they focus on eating. If they have something to say, they wait until after eating to say it.

I herek no taheka^, ira haca^ ko kakaenen to heci^ no 'adifongfong, faheka'  
sa cangra a maemin.

飯後還有新鮮的林投果可以吃，大家都覺得好新奇。

After their meal, there is fresh screwpine fruit to eat, which is a novel treat  
for the guests.

慢

原

Manga'ay to a cinglaw! Satata'ak sa ci Kolas a somowal toya nika'aredet no taheka^ i honi^!

總算可以說話了。吉娃斯大聲地說剛才的食物真的好好吃！

Now that they can finally speak, Giwas loudly exclaims that the food was so delicious!

Pasowal sa ci Masa^ i ci Kolasan, “Mamaraod to ko pifotingan to kakahong, itiya i, adihay ko kakahong to malo kakaenen.

si Masagaz 告訴吉娃斯, 飛魚季就要開始了, 到時候就有好吃的飛魚可以吃了。

si Masagaz tells Giwas that the flying fish season is about to start, which means soon there will be delicious flying fish to eat.

Caay ka saterep ci Namoh a mangalay a komaen. Tada lipahak ko nikalafi^ ita anini^ a romi'ad.

乃奈也吵著要吃。今天的晚餐真是太歡樂了。

Nainai wants to try some too. Everyone shared such a happy meal today!

一般單詞

中文	詞性	族語
探測	動詞	maditek
水氣	名詞	'o'ol
矮的;低的	形容詞	poener
地下屋	名詞	mikilaenoay to sera^ a loma'
蓋	動詞	pipatireng
一層一層	量詞	cecace:cay a tongroh
鵝卵石	名詞	si'elac
縫隙	名詞	la'ed
累積	動詞	masarad
流動	動詞	masonol
挑選	動詞	mipili'
搬運	動詞	micolo'
預報	名詞	piparatoh
端上	動詞	pataheka^
新奇的	形容詞	kafaheka'an

中文	詞性	族語
衛星	名詞	maeferay a fo'is
地球	名詞	'oriraw
雲層	名詞	cahid
高氣壓	名詞	kaw-ci-ya
低氣壓	名詞	ti-ci-ya
分子	名詞	rafor
凝結	動詞	malo'itad
浮力	名詞	mifawfaway a 'icel
