Treasure Hunt

我們去尋寶

atɬnɬ tapinange sisini tamna cina
ucani macu'u. tia aviciɬn na
nusuku 'apakɬnɬ manu in.

A momma siliq bird found a piece
of fruit to take to the nest to feed
her babies.

希利克鳥媽媽找到了一顆果實，要帶
回巢中給小鳥寶寶吃。

nakai ucani maamia sua macu'u, ka'an̄
musutamp̄ sovungūn na taturu manu.
mam̄m̄k̄ cina.

But one piece of fruit wasn't enough for
3 babies, so the momma siliq bird didn't
know what to do.

可是一顆果實不夠分給三個小鳥寶寶，希
利克鳥媽媽很傷腦筋。

noo ka'anɕin tarasangai umoni sua
tapinange sisini ia, ka'anɕ cu cau
tavara'ɕ mucimɕrɕ aracakanɕ.

When the siliq bird constantly
chirps irritatedly, the people of our
tribe cannot go hunting.

如果希利克鳥一直叫，族人們就不
可以上山打獵。

ma'incu! makaan isi macakuarᵀ
niaracakana!

Luckily, this hunt was already a great
success!

幸好，這次打獵已經大豐收了！

mati'arangꞥ cuma 'aramꞥ, tia 'apaviciꞥn
Na'u, movua 'esi na tacangina Pori.

Dad prepared meat for Giwas to bring
to Bayan at the ancient battlefield.

爸爸準備了一些獵物，Na'u 帶給住在古戰
場的 Pori。

tia mukusa tacangina cacana. Na'u
mataa Pa'ua niatana ucani
niaritapasua tavanga nupasua.

On their way, Giwas and Behuy
discovered a treasure map.

在前往古戰場的路上，Na'u 和 Pa'ua 檢
到了一張藏寶圖。

pacɸpɸngɸ Na'u, manasɸ rupacɸ
mamanɸng sua nivɸngɸa 'inia.

Giwas imagined the treasure must be
many excellent bows.

Na'u 認為寶藏一定是許多精良的弓箭。

makasi Pa'ㄊ, nivㄊngㄊa iisua ia,
manasㄊ 'itumuru sa'o'o kㄊnㄊa.

Behuy thought the treasure must be
delicious food.

Pa'ㄊ 說寶藏一定是許許多多的美食。

sua cəpəngə Ngəkau ia, 'esi 'inia
kacaua kəkənang.

Nainai thought it must be a group of
monkey friends.

Ngəkau 想像著寶藏是一大群的同伴。

nakai makasi Pori, ka'anx tavxngxa
nupasx. iisua ia Atayal tamna siasxpxrx
sinatx.

But Bayan said it wasn't a treasure map,
it was Atayal numbers.

可是 Pori 卻說這不是藏寶圖，這是泰雅數字。

sua tina'isi Atayal nangiri ia, 'una tapikupiku, 'una makai capai cimɤrɤ.

Atayal weaving has two patterns: the rhombus and the mountain.

泰雅族的織布花紋，有菱形紋和山形紋兩種。

sua makai capai cimɤrɤ ia, nguai kani
Atayal tamna siasɤpɤrɤ.

Some say mountain patterns are Atayal
numbers.

有人說山形紋就是泰雅的數字。

tumatimana isi ia siasɤpɤrɤ misee.

Na'u mataa Pa'ɤ manatɤrɤ cu cɤpɤngɤ,
nguai sua isi tavɤngɤa nupasɤ misee.

After learning the symbols were
numbers, Giwas and Behuy were still
sure it was a code for finding treasure.

一聽這些符號是數字，Na'u 和 Pa'ɤ 更堅
持這一定是藏寶的密碼了。

sumasima'ᵀ sua Pori makasi, manasᵀ
noo 'apaica tina'isia siasᵀpᵀrᵀ muca, tia
atᵀnᵀ kasakᵀna nupasᵀ misee.

Bayan jokingly said, maybe they could
find treasure by following the numbers.

Pori 開玩笑說，或許照著織布上的數字走，
就能找到寶藏了。

macangcangarꨀ Na'u mataa
Pa'ꨀ, 'acecu tikirimi nupasꨀ.

Giwas and Behuy happily
started searching.

Na'u 和 Pa'ꨀ 馬上高興地去尋寶。

'apaica nguani niaritapasxa iisua muca.
nakai 'inmaamia atxn nimitvxngr
tia parakicacx nguani Pori.

Following the numbers, they found
Bayan who had hidden to scare them.

他們照著藏寶圖上的數字走，卻只找到
躲起來嚇他們的 Pori。

maacaca Pori makasi, vanai sii nimavici

Na'u 'aramꨀ, iimua totasiarꨀ nimapꨀnꨀ macu'u
karu, tia sovungu nguani.

Bayan laughed and said since Giwas brought
meat for Bayan, he should take food he
harvested that morning as treasure to share with
everyone.

Pori 笑著說，因為 Na'u 帶了很多獵物來給
Pori，所以他要把早上摘的水果當成寶藏分
給大家。

sumasɤpɤrɤ, kangangaan 'una maan
urucin tammi, uaru mamiriki mataa upitu
nivanga. tia pakɤnnanu sovungu?

In total there were: 12 sweet potatoes, 8
peaches, and 7 bananas. But how to
distribute it fairly?

算一算，一共有 12 條地瓜、8 顆桃子和
7 根芭蕉。該怎麼公平分配呢？

pacɤpɤngɤ Na'u, nimakasi cuma.
'urupaca cɤngfa, tavara'ɤ sumasɤpɤrɤ
tia mati'arangɤ upeni, muranɤ papeni cau.

Giwas remembered her father had said,
use multiplication to calculate how many
items to prepare for a group.

Na'u 想起爸爸說過，乘法可以算出要幫一群人準備多少數量的東西。

noo 'urupaca cufa, tavara' ʘ katʘʘʘʘa
sovungu na cau.

Division is used for dividing items
fairly among a group.

除法則可以公平的把東西分配給一群人。

maan urucin tammi. katutua
sovungun sapatu cau. tacini
cau tia uturu kavangvang tammi.

If 12 sweet potatoes are split fairly
among four people, each person gets
three.

12 條地瓜，公平地分配給 4 個人，每
個人可以分得 3 條地瓜。

uaru mamiriki. katatata sovungun
sapatat cau. tacini cau tia macucusa
mamiriki.

If 8 peaches are split fairly among four
people, each person gets two.

8 顆桃子，公平地分配給 4 個人，每個人
可以分得 2 顆桃子。

upitu nivanga. katututa sovunguun
sasupatua cau. tia... waa! 'inmaamia
ucani Pa'ua tamna!

If 7 bananas are split fairly among four
people.....Ah! Behuy only gets one!

7 根香蕉，公平地分配給 4 個人.....哇！
Pa'ua 只分到 1 根！

makenanu! mapɛnɛa pa ucani, tia cu
matɛɛtɛa!

Don't worry, we just have to pick one
more banana and we can split it fairly!

沒關係，只要再摘一根香蕉，就可以公平
分配了！

'una macu'u kən̄a, takutavara'ɬ pa
cufa. cucuruana maman̄ng nupasɬ isi!

They had fruit to eat and learned about
fair division, what a great treasure!

有水果吃，又學到了公平的除法，這樣的
寶藏真是太棒了！

macangcangarꞤ kavangvang sisini
tamna cina.

Even the momma siliq bird was happy.

就連希利克鳥媽媽都很高興呢。
